Linda Sternheimer, Development Manager  
Cleveland-Cuyahoga County Port Authority  
Email: Linda.Sternheimer@portofcleveland.com

Dear Mr. Scalabrino and Ms. Sternheimer;

This letter is to confirm our interest in incorporating the two remaining Hulett Ore Unloaders and the William G. Mather Museum in the plan to bring a new and exciting museum to the North Coast of Ohio.

The Ohio Museum of Transportation and Industry is a concept unique to North America — an exciting, interactive and educational look at all forms of transportation with a focus on the key role that Ohio has played and continues to play in our future. The exhibits, activities within the complex itself and daily operations of the attractions will offer a unique and memorable experience for all attendees and ensure repeat visits and continued growth. The Ohio Museum of Transportation and Industry will become a destination location that attracts visitors throughout North America and the rest of the world.

The Hulett Ore Unloaders and the William G. Mather are both important historical components of Ohio's industrial heritage and we hope to incorporate them into a campus located near the North Coast Harbor. In order to determine the costs associated with rebuilding and restoration of the Huletts, we request access to inspect the parts which are on the Port Authority property.

We would very much like to work hand in hand with the Port Authority to bring this concept of a new and exciting adventure to the North Coast. Please contact us with information on how to proceed.

Sincerely,

John Shephard  
Director  
Ohio Museum of Transportation and Industry
